Presentation	About This Webinar	Date	Time	Registration Link	Presented by:
<p>“Verdinexor: A Novel Oral Therapy for Canine Lymphoma” #23013 1 RACE-Approved Credit Hour, RACE# 27059-900255</p>	<p>This lecture will discuss the novel class of drugs called SINE inhibitors, with emphasis on verdinexor (Laverdia-CA1). We will review SINE mechanism of action, along with a thorough review of the data leading to a reasonable expectation of efficacy and FDA conditional approval of Laverdia-CA1. We will also look at where this new oral option fits into specialty and primary care practice therapies as consideration for future use. The attendee will learn how to properly dose and safely dispense verdinexor as well as how to monitor the lymphoma patient on verdinexor, including how to address any potential adverse events.</p>	2/28/2023	2:00 PM Eastern	https://attendee.gotowebinar.com/register/7284241871748579672	Pam Mitchell, MS, DVM Veterinary Services Manager, Strategic Accounts, Dechra Veterinary Products
<p>“Zennoation in Sedation: Rethinking What is Possible” #23014 1 RACE-Approved Credit Hour, RACE# 27059-918761</p>	<p>In this educational presentation, we will discuss sedation in dogs. The foundation will be set by reviewing the basic physiology behind commonly used sedatives in dogs. We will discuss the most commonly used sedatives and reversal agents, and introduce the novel sedative Zenalpha (medetomidine and vatinoxan hydrochlorides).</p>	3/2/2023	2:00 PM Eastern	https://attendee.gotowebinar.com/register/2630181774699720538	Jennifer Kasten, DVM Professional Services Veterinarian, Dechra Veterinary Products
<p>“Update on Managing Canine Hyperadrenocorticism” #23015 1.5 RACE-Approved Credit Hours, RACE# 27059-869593</p>	<p>Canine Hyperadrenocorticism (Cushing's Disease) can be a challenging yet rewarding disease to manage. This presentation will review all aspects of Cushing's: basic pathophysiology, clinical signs, diagnostics, differentiating tests, treatment and monitoring. A series of cases to increase understanding of managing Cushing's patients will be presented and the final section highlights ways to enhance owner compliance.</p>	3/14/2023	12:00 PM Eastern	https://attendee.gotowebinar.com/register/2942418887732324186	Bridget Fitzpatrick, DVM Professional Services Veterinarian, Dechra Veterinary Products

<p>“Maximizing Topical Therapy in Companion Animal Practice” #23018 1 RACE-Approved Credit Hour, RACE# 27059-906349</p>	<p>With dermatologic conditions making up a large volume of the caseload in companion animal medicine and with antimicrobial resistance on the rise, topical therapies need to play a bigger role in dermatologic therapy. This presentation will discuss why topical therapies are helpful and how cytology helps guide topical product choice. The most common active ingredients in topical products for companion animals will be highlighted including their mechanism of action and suggested use. By having a complete understanding of active ingredients, veterinarians will be better equipped to make a topical product selection. Compliance strategies will be discussed to help ensure that what a veterinarian prescribes actually gets used.</p>	<p>3/30/2023</p>	<p>12:00 PM Eastern</p>	<p>https://attendee.gotowebinar.com/register/8006039369548283996</p>	<p>Julie Kluxdal, DVM Professional Services Veterinarian, Dechra Veterinary Products</p>
